PATENT

Preliminary Classification:

Proposed Class:

Subclass:

NOTE: "All applicants are requested to include a preliminary classification on newly filed patent applications. The preliminary classification, preferably class and subclass designations, should be identified in the upper right-hand corner of the letter of transmittal accompanying the application papers, for example 'Proposed Class 2, subclass 129.'" M.P.E.P. § 601, 7th ed.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Box Patent Application
Assistant Commissioner for Patents
Washington, D.C. 20231

NEW APPLICATION TRANSMITTAL

Transmitted herewith for filing is the patent application of **CRAIG H. BAKER**
Inventor(s): **ET AL**

WARNING: 37 C.F.R. § 1.41(a)(1) points out:

"(a) A patent is applied for in the name or names of the actual inventor or inventors.

"(1) The inventorship of a nonprovisional application is that inventorship set forth in the oath or declaration as prescribed by § 1.63, except as provided for in § 1.53(d)(4) and § 1.63(d). If an oath or declaration as prescribed by § 1.63 is not filed during the pendency of a nonprovisional application, the inventorship is that inventorship set forth in the application papers filed pursuant to § 1.53(b), unless a petition under this paragraph accompanied by the fee set forth in § 1.17(i) is filed supplying or changing the name or names of the inventor or inventors."

For (title): **ELECTRICAL SOCKET CONTACT
WITH TINES**

CERTIFICATION UNDER 37 C.F.R. § 1.10*

(Express Mail label number is mandatory.)

(Express Mail certification is optional.)

I hereby certify that this New Application Transmittal and the documents referred to as attached therein are being deposited with the United States Postal Service on this date **8-16-99**, in an envelope as "Express Mail Post Office to Addressee," mailing Label Number **EJ918266895**, addressed to the: Assistant Commissioner for Patents, Washington, D.C. 20231.

LEONARD J. BIRCH
(type or print name of person mailing paper)

Signature of person mailing paper

WARNING: Certificate of mailing (first class) or facsimile transmission procedures of 37 C.F.R. § 1.8 cannot be used to obtain a date of mailing or transmission for this correspondence.

***WARNING:** Each paper or fee filed by "Express Mail" must have the number of the "Express Mail" mailing label placed thereon prior to mailing. 37 C.F.R. § 1.10(b).

"Since the filing of correspondence under § 1.10 without the Express Mail mailing label thereon is an oversight that can be avoided by the exercise of reasonable care, requests for waiver of this requirement will **not** be granted on petition." Notice of Oct. 24, 1996, 60 Fed. Reg. 56,439, at 56,442.

(New Application Transmittal [4-1]—page 1 of 11)

1. Type of Application

This new application is for a(n)

(check one applicable item below)

Original (nonprovisional)

Design

Plant

WARNING: Do not use this transmittal for a completion in the U.S. of an International Application under 35 U.S.C. § 371(c)(4), unless the International Application is being filed as a divisional, continuation or continuation-in-part application.

WARNING: Do not use this transmittal for the filing of a provisional application.

NOTE: If one of the following 3 items apply, then complete and attach ADDED PAGES FOR NEW APPLICATION TRANSMITTAL WHERE BENEFIT OF A PRIOR U.S. APPLICATION CLAIMED and a NOTIFICATION IN PARENT APPLICATION OF THE FILING OF THIS CONTINUATION APPLICATION.

Divisional.

Continuation.

Continuation-in-part (C-I-P).

2. Benefit of Prior U.S. Application(s) (35 U.S.C. §§ 119(e), 120, or 121)

NOTE: A nonprovisional application may claim an invention disclosed in one or more prior filed copending nonprovisional applications or copending international applications designating the United States of America. In order for a nonprovisional application to claim the benefit of a prior filed copending nonprovisional application or copending international application designating the United States of America, each prior application must name as an inventor at least one inventor named in the later filed nonprovisional application and disclose the named inventor's invention claimed in at least one claim of the later filed nonprovisional application in the manner provided by the first paragraph of 35 U.S.C. § 112. Each prior application must also be:

(i) An international application entitled to a filing date in accordance with PCT Article 11 and designating the United States of America; or

(ii) Complete as set forth in § 1.51(b); or

(iii) Entitled to a filing date as set forth in § 1.53(b) or § 1.53(d) and include the basic filing fee set forth in § 1.16; or

(iv) Entitled to a filing date as set forth in § 1.53(b) and have paid therein the processing and retention fee set forth in § 1.21(f) within the time period set forth in § 1.53(f).

37 C.F.R. § 1.78(a)(1).

NOTE: If the new application being transmitted is a divisional, continuation or a continuation-in-part of a parent case, or where the parent case is an International Application which designated the U.S., or benefit of a prior provisional application is claimed, then check the following item and complete and attach ADDED PAGES FOR NEW APPLICATION TRANSMITTAL WHERE BENEFIT OF PRIOR U.S. APPLICATION(S) CLAIMED.

WARNING: If an application claims the benefit of the filing date of an earlier filed application under 35 U.S.C. §§ 120, 121 or 365(c), the 20-year term of that application will be based upon the filing date of the earliest U.S. application that the application makes reference to under 35 U.S.C. §§ 120, 121 or 365(c). (35 U.S.C. § 154(a)(2) does not take into account, for the determination of the patent term, any application on which priority is claimed under 35 U.S.C. §§ 119, 365(a) or 365(b).) For a c-i-p application, applicant should review whether any claim in the patent that will issue is supported by an earlier application and, if not, the applicant should consider canceling the reference to the earlier filed application. The term of a patent is not based on a claim-by-claim approach. See Notice of April 14, 1995, 60 Fed. Reg. 20,195, at 20,205.

5. Declaration or oath (including power of attorney)

NOTE: A newly executed declaration is not required in a continuation or divisional application provided that the prior nonprovisional application contained a declaration as required, the application being filed is by all or fewer than all the inventors named in the prior application, there is no new matter in the application being filed, and a copy of the executed declaration filed in the prior application (showing the signature or an indication thereon that it was signed) is submitted. The copy must be accompanied by a statement requesting deletion of the names of person(s) who are not inventors of the application being filed. If the declaration in the prior application was filed under § 1.47, then a copy of that declaration must be filed accompanied by a copy of the decision granting § 1.47 status or, if a nonsigning person under § 1.47 has subsequently joined in a prior application, then a copy of the subsequently executed declaration must be filed. See 37 C.F.R. §§ 1.63(d)(1)-(3).

NOTE: A declaration filed to complete an application must be executed, identify the specification to which it is directed, identify each inventor by full name including family name and at least one given name, without abbreviation together with any other given name or initial, and the residence, post office address and country or citizenship of each inventor, and state whether the inventor is a sole or joint inventor. 37 C.F.R. § 1.63(a)(1)-(4).

NOTE: "The inventorship of a nonprovisional application is that inventorship set forth in the oath or declaration as prescribed by § 1.62, except as provided for in § 1.53(d)(4) and § 1.63(d). If an oath or declaration as prescribed by § 1.63 is not filed during the pendency of a nonprovisional application, the inventorship is that inventorship set forth in the application papers filed pursuant to § 1.53(b), unless a petition under this paragraph accompanied by the fee set forth in § 1.17(f) is filed supplying or changing the name or names of the inventor or inventors." 37 C.F.R. § 1.41(a)(1).

11. Small Entity Statement(s)

- ☐ Statement(s) that this is a filing by a small entity under 37 C.F.R. § 1.9 and 1.27 is (are) attached.

WARNING: "Status as a small entity must be specifically established in each application or patent in which the status is available and desired. Status as a small entity in one application or patent does not affect any other application or patent, including applications or patents which are directly or indirectly dependent upon the application or patent in which the status has been established. The refiling of an application under § 1.53 as a continuation, division, or continuation-in-part (including a continued prosecution application under § 1.53(d)), or the filing of a reissue application requires a new determination as to continued entitlement to small entity status for the continuing or reissue application. A nonprovisional application claiming benefit under 35 U.S.C. § 119(e), 120, 121, or 365(c) of a prior application, or a reissue application may rely on a statement filed in the prior application or in the patent if the nonprovisional application or the reissue application includes a reference to the statement in the prior application or in the patent or includes a copy of the statement in the prior application or in the patent and status as a small entity is still proper and desired. The payment of the small entity basic statutory filing fee will be treated as such a reference for purposes of this section." 37 C.F.R. § 1.28(a)(2).

WARNING: "Small entity status must not be established when the person or persons signing the . . . statement can *unequivocally* make the required self-certification." M.P.E.P., § 509.03, 6th ed., rev. 2, July 1996 (emphasis added).

(complete the following, if applicable)

- ☐ Status as a small entity was claimed in prior application

_____/_____, filed on _____, from which benefit is being claimed for this application under:

35 U.S.C. § ☐ 119(e),

☐ 120,

☐ 121,

☐ 365(c),

and which status as a small entity is still proper and desired.

- ☐ A copy of the statement in the prior application is included.

Filing Fee Calculation (50% of A, B or C above)

\$_____

NOTE: Any excess of the full fee paid will be refunded if small entity status is established and a refund request are filed within 2 months of the date of timely payment of a full fee. The two-month period is not extendable under § 1.136. 37 C.F.R. § 1.28(a).

12. Request for International-Type Search (37 C.F.R. § 1.104(d))

(complete, if applicable)

- ☐ Please prepare an international-type search report for this application at the time when national examination on the merits takes place.

13. Fee Payment Being Made at This Time

(See attached "COVER SHEET FOR
ASSIGNMENT ACCOMPANYING NEW
APPLICATION".) \$ _____

☐ Petition fee for filing by other than all the
inventors or person on behalf of the inventor
where inventor refused to sign or cannot be
reached
(\$130.00; 37 C.F.R. §§ 1.47 and 1.17(i)) \$ _____

☐ For processing an application with a
specification in
a non-English language
(\$130.00; 37 C.F.R. §§ 1.52(d) and 1.17(k)) \$ _____

☐ Processing and retention fee
(\$130.00; 37 C.F.R. §§ 1.53(d) and 1.21(l)) \$ _____

☐ Fee for international-type search report
(\$40.00; 37 C.F.R. § 1.21(e)) \$ _____

NOTE: 37 C.F.R. § 1.21(l) establishes a fee for processing and retaining any application that is abandoned for failing to complete the application pursuant to 37 C.F.R. § 1.53(f) and this, as well as the changes to 37 C.F.R. §§ 1.53 and 1.78(a)(1), indicate that in order to obtain the benefit of a prior U.S. application, either the basic filing fee must be paid, or the processing and retention fee of § 1.21(l) must be paid, within 1 year from notification under § 53(f).

Total fees enclosed \$ _____

14. Method of Payment of Fees

- ☐ Check in the amount of \$ _____

- ☐ Charge Account No. _____ in the amount of
\$ _____

A duplicate of this transmittal is attached.

NOTE: Fees should be itemized in such a manner that it is clear for which purpose the fees are paid. 37 C.F.R. § 1.22(b).

15. Authorization to Charge Additional Fees

WARNING: If no fees are to be paid on filing, the following items should not be completed.

WARNING: Accurately count claims, especially multiple dependent claims, to avoid unexpected high charges, if extra claim charges are authorized.

- ☐ The Commissioner is hereby authorized to charge the following additional fees by this paper and during the entire pendency of this application to Account No. _____:

☐ 37 C.F.R. § 1.16(a), (f) or (g) (filing fees)

☐ 37 C.F.R. § 1.16(b), (c) and (d) (presentation of extra claims)

NOTE: Because additional fees for excess or multiple dependent claims not paid on filing or on later presentation must only be paid or these claims cancelled by amendment prior to the expiration of the time period set for response by the PTO in any notice of fee deficiency (37 C.F.R. § 1.16(d)), it might be best not to authorize the PTO to charge additional claim fees, except possibly when dealing with amendments after final action.

☐ 37 C.F.R. § 1.16(e) (surcharge for filing the basic filing fee and/or declaration on a date later than the filing date of the application)

☐ 37 C.F.R. § 1.17(a)(1)–(5) (extension fees pursuant to § 1.136(a)).

☐ 37 C.F.R. § 1.17 (application processing fees)

NOTE: “. . . A written request may be submitted in an application that is an authorization to treat any concurrent or future reply, requiring a petition for an extension of time under this paragraph for its timely submission, as incorporating a petition for extension of time for the appropriate length of time. An authorization to charge all required fees, fees under § 1.17, or all required extension of time fees will be treated as a constructive petition for an extension of time in any concurrent or future reply requiring a petition for an extension of time under this paragraph for its timely submission. Submission of the fee set forth in § 1.17(a) will also be treated as a constructive petition for an extension of time in any concurrent reply requiring a petition for an extension of time under this paragraph for its timely submission.” 37 C.F.R. § 1.136(a)(3).

☐ 37 C.F.R. § 1.18 (issue fee at or before mailing of Notice of Allowance, pursuant to 37 C.F.R. § 1.311(b))

NOTE: Where an authorization to charge the issue fee to a deposit account has been filed before the mailing of a Notice of Allowance, the issue fee will be automatically charged to the deposit account at the time of mailing the notice of allowance. 37 C.F.R. § 1.311(b).

NOTE: 37 C.F.R. § 1.28(b) requires “Notification of any change in status resulting in loss of entitlement to small entity status must be filed in the application . . . prior to paying, or at the time of paying, . . . the issue fee. . . .” From the wording of 37 C.F.R. § 1.28(b), (a) notification of change of status must be made even if the fee is paid as “other than a small entity” and (b) no notification is required if the change is to another small entity.

(New Application Transmittal [4-1]—page 9 of 11)

APPLICATION

OF

CRAIG H. BAKER, CLYDE T. CARTER, ALEX S. FATER, URS F. NAGER,

CHRISTOPHER PALAGI, CHRISTINE SVELNIS AND MARK A. WOJOICKI

FOR ELECTRICAL SOCKET CONTACT WITH TINES

037514-08699

BACKGROUND OF THE INVENTION

The present invention relates to electrical contacts in general, and more particularly to an electrical female socket contact that mates with a male pin contact to provide a sacrificial make-first/break-last contact arrangement for use in a "hot pluggable" electrical contact configuration.

There is a need for electrical contacts that can be connected and disconnected under an electrical load i.e., "hot pluggable" and at the same time have the capability of accommodating axial misalignment of pin and socket electrical contacts. Furthermore, the socket contact should be able to provide an arc receiving "sacrificial" portion to maintain electrical integrity of the fully mated pin and socket contacts.

It is accordingly a general object of the invention to fulfill this need.

BRIEF DESCRIPTION OF THE INVENTION

An electrical socket contact for mating with a pin contact utilizes at least one an axially extending arc receiving tine and at least one axially extending pin contact engaging tine. The arc receiving tine is positioned at a maximum distance from the socket axis that is greater than the maximum transverse dimension of the pin contact while the pin contact engaging tine is

037514-03699

Figure 6B is a sectional view taken along line 6B-6B with similar positional exaggeration to that shown in Figure 6A; and, Figures 7, 7A and 7B are similar to Figures 6, 6A and 6B, but instead illustrate a non-circular pin and the corresponding socket contact.

DETAILED DESCRIPTION

Turning now to the drawings, and particularly to Figure 1, there is shown an electrical connector indicated generally by the reference numeral 10. The connector 10 comprises a female socket contact 12 of the present invention and a male pin contact 14 that is depicted partially mated with the socket contact 12.

The socket contact 12 preferably has a plurality of relatively stiff tines 16 and a plurality of relatively flexible tines 18. Note that the axial length of tines 16 is longer than the axial length of the pin contacting tines 18. The tines 16 function as arc receiving tines which engage and disengage the male pin contact 14 in a make-first/break-last relationship. The arc receiving tines 16 are positioned with respect to the bore axis of the socket contact at a maximum distance that is greater than the maximum transverse distance (the diameter in the case of a circular male pin contact) of the pin contact. This dimensional arrangement permits misalignment of the axis of the male pin with the bore axis of the female socket contact, a situation that occurs in practical terms in a "hot pluggable" connector.

03314-0369

Figures 2 and 4 depict the relatively "loose" dimensional relationship of the male pin contact and the arc receiving tines 16. However, the pin contact engaging tines 18 have a different dimensional relationship with respect to the male pin. These tines 18 are position at a maximum distance from the socket contact bore axis that is less than the maximum transverse dimension of the pin contact to provide an electrically conductive, friction fit of the axially extending pin contacting surface 20 (Figures 3 and 5).

Looking at Figures 6, 6A and 6B, these Figures illustrate the tines 16 and 18 with each tine having the same radius, but with the tines 18 having been compressed inwardly towards the bore axis as shown in exaggerated form in Figures 6A and 6B. A similar arrangement is depicted in the Figure 7, 7A and 7B series, but with a non-circular male pin contact and non-circular tines 18a.

Having described in detail a preferred embodiment of our invention, it will be apparent to those in the art that numerous modifications can be made therein without departing from the scope of the invention as defined in the following claims.

What we claim is:

1. An electrical socket contact for mating with a pin contact comprising:

an electrically conductive body having a pin contact engaging axial bore defined by:

at least one relatively fixed, pin contact arc receiving tine upon disconnection of the mating pin and socket contacts; and,

at least one relatively movable, pin contact engaging tine upon axial mating,

said pin contact arc receiving tine having an axially extending pin contact engaging surface positioned at a maximum distance from the bore axis that is greater than the maximum transverse dimension of the pin contact and said pin contact engaging tine having an axially extending pin contacting surface positioned at a maximum distance from the bore axis that is less than the maximum transverse dimension of the pin contact and having an axial length that is less than the axial length of the pin contact arc receiving tine.

2. The electrical socket contact of claim 1 further comprising two opposed, pin contact arc receiving tines and two opposed pin contact engaging tines.

3. The electrical socket contact of claim 1 wherein said pin contact has a circular transverse cross-section.

4. The electrical socket contact of claim 1 wherein said pin contact has a non-circular transverse cross-section.

5. The electrical socket contact of claim 4 wherein said pin contact has a square transverse cross-section.

6. An electrical socket contact for mating with a pin contact comprising:

an electrically conductive body having a pin contact engaging axial bore defined by:

at least one relatively fixed, pin contact arc receiving tine upon disconnection of the mating pin and socket contacts; and,

at least one relatively movable, pin contact engaging tine upon axial mating,

said pin contact arc receiving tine having an arcuate, axially extending pin contact engaging surface with a radius greater than the radius of the pin contact and said pin contact engaging tine having an arcuate, axially extending pin contacting surface positioned at a maximum distance from the bore axis that is less than the maximum transverse dimension of the pin contact and having an axial length less than the axial length of the pin contact arc receiving tine.

7. The electrical socket contact of claim 6 further comprising two radially opposed, pin contact arc receiving tines and two opposed pin contact engaging tines.

8. The electrical socket contact of claim 7 wherein the ratio of the cumulative arcuate length of the two radially opposed pin contact arc receiving tines and the cumulative arcuate length of the two radially opposed, pin contact engaging tines is approximately 2:1.

09344-084899

ABSTRACT OF THE DISCLOSURE

An electrical socket contact with a plurality of tines for mating with a pin contact. At least one tine functions as an initial arc receiving tine while another tine functions as an axially extending pin contacting tine. The pin contacting tine has a shorter axial length than the arc receiving tine so that the arc receiving tine produces a make-first/break-last electrical contact.
